PROFESSIONAL EXPERIENCE

Aeonic AI Remote
Security and Network Analyst · Contractor Jan 2026 – Present

- Built and operated a PHI document-ingestion pipeline with layered threat detection, YARA/regex signature analysis, review by Gemma 4B SLM grounded in MITRE ATLAS adversarial AI threat examples via RAG.
- Hardened the platform with microsegmentation, OPNsense perimeter firewall with IDS/IPS, internal PKI/CA for TLS, LUKS-encrypted storage, and SGID file permissions
- Configured SIEM/Syslog centralized logging across all services for continuous audit coverage.
- Designed with a team of three the full-stack production platform (C#/ASP.NET, PostgreSQL, Apache2) on Linux/Proxmox; responsible for architecture decisions, code reviews, and release sign-off.
- Ran structured security reviews before each release covering NIST SP 800-53 control families.

UArizona Institute for Computation & Data-Enabled Insight (ICDI) — AI Core Tucson, AZ
XR Development Lead Jun – Dec 2025

- Led 8 developers across concurrent real-time systems; set code quality standards, ran code reviews, profiled and resolved end-to-end bottlenecks, and turned stakeholder requirements into production software on time within scope.

XR Developer & AI Instructor Oct 2024 – Jun 2025

- Shipped the Lundgren Retail Lab Digital Twin — a production Android app (C++, Android Studio, Meta XR) deployed across Meta Quest 2/3/3S fleets; sustained a minimum of 83 fps under digital-twin simulation loads using Octree-based LiDAR data budgeting and geometry processing.
- Shipped 4 production AI/XR applications with 50+ ICDI researchers in an agile cycle; designed and delivered a hands-on AI curriculum from scratch to 15+ students and faculty covering LLM workflows, RAG pipelines, and MITRE-grounded threat modeling.

EDUCATION

The University of Arizona Dec, 2025
Bachelor of Applied Science | Applied Computing, Emphasis in Cloud Computing Magna Cum Laude

Imperial Valley College & Laney College June, 2023
Associate Degree | Computer Science President's Honor List, Dean's List

CERTIFICATIONS

CompTIA Security+ CE (in progress; exam scheduled Jan, 2027)
Cyber Defense (NSA/DHS Center of Academic Excellence in Cyber Defense — University of Arizona, 2025)
Coursework: Cyber Threat Intelligence, Active Cyber Defense, Principles of ZTI, Windows and Linux Security, Cloud Security

PROJECTS

PHI-Compliant AI Threat Detection Pipeline — Aeonic AI 2026

- End-to-end document security pipeline: YARA/regex signature detection as first layer; Gemma 4B SLM grounded in MITRE ATLAS adversarial threat examples via RAG as second layer; quarantine sandbox for flagged files. Platform hardened with VLAN segmentation, OPNsense IDS/IPS, PKI/CA, LUKS storage, SIEM/Syslog, and SGID file permissions.

Cyber Defense XR Training Module — Senior Capstone 2025

- Immersive cybersecurity training environment combining digital twin scenarios with real-time AI guidance. Teaches defensive strategies mapped to MITRE ATT&CK framework through hands-on spatial computing.

TECHNICAL SKILLS

SecOps: SIEM/Syslog, YARA Rules, OPNsense IDS/IPS, Microsegmentation, PKI/CA, LUKS encryption, SGID File Permissions, MITRE ATT&CK/ATLAS, Vulnerability Assessment, Platform Audit
Programming Languages: Python, C++, JavaScript, Node.js, SQL/PostgreSQL, Bash
Engineering Practices: Git, agile, code review, regression testing, CI/CD, Docker, full SDLC ownership
AI: RAG pipelines, LLM/SLM deployment (Gemma 4B), OpenAI API, Anthropic Claude, n8n, Prompt Engineering
Spoken Languages: English, Spanish
